Project Overview:

A stokvel subscription platform (SaaS App) called Abangani NS Group where parents pay a monthly fee towards the stokvel, the stokvel will cover school uniform plus full stationery for the children at the beginning of every year. Subscribers are required to pay for every month, e.g, when a user joins in March/April, they would have to pay from January until day of registration, meaning they will pay from January to March then continue until december, leading to the new cycle.

Pricing:

- Primary school learners: R195, Admin fees: R45, 150 goes to uniform and stationery
- High school learners: R295, Admin fees: R45, 250 goes to uniform and stationery
- Cashback tier (For those who choose cashback instead of uniforms and stationery):
First option- R500, R60 goes to admin fees, R440 goes to uniform and stationery, which can be withdrawn if user chooses. Second option- R1000, R105 goes to admin fees, R895 goes to uniform and stationery, which can also be withdrawn if user chooses.

There are only 3 tiers in total: Primary school, High School, and cashack. The cashback tier is a single tier where users can either pay R500/R1000, and it is the only tier where users can withdraw/request cashack. Update the pricing section on the homepage and the agreements section on the registration form wizard with this new pricing data.

Dashboard

The user dashboard showcases user tracking number, payment progress (shows users their monthly payment records which can be downloaded as spreadsheet/csv/pdf- dropdown to choose), Monthly payments (where users pay their monthly subscriptions online, directly on the app- scheduled to start from the 10th of March 2026), Children (users view/edit child information or add more children). If a user joins midterm (Feb-Dec), they would be required to pay for the previous month, e.g if a user joins in June, they would be required to pay from January to June. But if the user cannot settle the outstanding months at once, they can settle from one to all according to what they choose. For example, those who join in June must pay for June (mandatory, basic) and choose to settle either one (Jan) or all, meaning they will pay for June and January (they can also choose more if they like). If they chose 1 month, then in July they will pay for July (mandatory, basic) and settle another month (Feb or more) until all outstanding months are settled.

Admin dashboard (Secret)

The admin dashboard is a secret admin only access link where users access (view/edit/delete) data from the database. Admin access code: ABANGANI26
